Request for Proposals:

Randomized Controlled Trials to Evaluate Social Programs Whose Delivery Will Be Funded by Government or Other Entities

March 2018
I. **Overview:**

The Laura and John Arnold Foundation’s (LJAF) Evidence-Based Policy team invites grant applications to conduct randomized controlled trials (RCTs) of social programs in any area of domestic policy in which:

(i) LJAF will fund the RCT, and government or another entity will fund the program’s delivery; and
(ii) The RCT meets the additional selection criteria set out below.

Our goal in funding such RCTs is to build the body of programs rigorously shown to produce sizable, sustained benefits to participants or society, and to do so in a cost-efficient manner by leveraging program funds contributed by government, philanthropic foundations, or other funders.

The selection criteria in this request for proposals (RFP) are similar to those in LJAF’s RFP for low-cost RCTs. Specifically, we seek to fund sizable RCTs with strong designs that evaluate programs with highly promising prior evidence or that are widely implemented, and the RCTs must measure outcomes of self-evident policy importance over a sustained period of time. In contrast to the low-cost RCT RFP, however, this RFP does not limit the study cost to $300,000 and thus can accept RCT proposals in cases where low-cost RCTs are not feasible (e.g., because the study’s key outcomes cannot be measured inexpensively using administrative data). Even in these higher cost studies, however, we encourage cost-saving approaches, as described below.

Applicants proposing a low-cost RCT may apply for a grant through this RFP if our low-cost RCT RFP – which only accepts applications within certain time frames during the year – is not active. Otherwise, we encourage such applicants to apply through the low-cost RCT process, as the chances of award are higher under that process. (LJAF plans to release its next RFP for low-cost RCTs in summer or fall 2016, and to release such RFPs on a regular basis in 2017 and thereafter. Please [join](mailto:) our email distribution list to receive notification of such releases.)

II. **Application Process and Selection Criteria:**

A. **We ask applicants first to submit a letter of interest (maximum three pages).** Applicants whose letters are reviewed favorably will be invited to submit a full proposal (maximum six pages). There is no deadline for submitting a letter of interest; applicants may submit a letter at any time via email to [RCTopportunity@arnoldfoundation.org](mailto:RCTopportunity@arnoldfoundation.org). We will notify applicants within one month whether they are invited to submit a full proposal (full proposals must be invited). Applicants may use their own format, with single or double spacing, and an 11-point font or larger. The page limit does not include attached letters or other documents specifically requested in this RFP.

B. **Letters of interest and full proposals will be reviewed by the LJAF Evidence-Based Policy team and, as needed, outside reviewers, based on the selection criteria below.** Both the LJAF team and outside reviewers have expertise in RCT evaluations.

C. **Selection Criteria:**

We ask applicants to address the following four criteria in both the letter of interest and the full proposal. The full proposal should provide more detail (e.g., on the study design) than the letter of interest, and also address any questions or issues identified by LJAF in its invitation to submit a full proposal.
- **PROGRAM FUNDER:** Will the proposed RCT evaluate a program whose delivery is paid for by another funder, and does that funder, or do other essential parties, agree to the study? To verify such agreement(s), the reviewers will look for attached letters or other communications showing that the necessary parties (e.g., program funder and/or program provider) assent to the study, including random assignment. Such agreement(s) may be tentative at the time the letter of interest is submitted, but should be finalized before submission of the full proposal. We especially encourage agreements in which the necessary parties not only assent to the study, but also provide a credible description of how they or others would use the study findings to inform program or policy decisions.

- **IMPORTANCE:** Is the applicant proposing to evaluate a program –
  
  - That is backed by highly-promising prior evidence, suggesting it could produce sizable impacts on outcomes of recognized policy importance – such as educational achievement, workforce earnings, criminal arrests, hospitalizations, child maltreatment, and government spending. For example, we specifically encourage applications seeking to replicate findings from prior rigorous evaluations that are especially promising but not yet conclusive (e.g., due to only short-term follow-up, a single-site study design, or well-matched comparison groups but not randomization). As a threshold condition for “highly promising” evidence, applicants should show that the program can be or (preferably) has been successfully delivered under real-world implementation conditions.
  
  - or -
  
  - For which there are other compelling reasons to evaluate its effectiveness – e.g., it is, or soon will be, widely implemented with significant taxpayer investment, and its impact on its targeted outcomes is currently unknown.

Please note that, to meet this criterion, it is not sufficient to establish that the study addresses an important problem; applicants must also present compelling reasons to evaluate the specific program.

- **EXPERIENCED RESEARCHER:** Does the applicant’s team include at least one researcher in a key substantive role who has previously carried out a well-conducted RCT? A well-conducted RCT is characterized, for example, by low sample attrition, sufficient sample size, close adherence to random assignment, and valid outcome measures and statistical analyses. To address this criterion, applicants should submit reports from prior RCTs that the researcher has conducted (please send the full study reports as email attachments to the letter of interest – no more than two reports in all). Reviewers will rely primarily on these reports in assessing this selection criterion.

- **STUDY DESIGN:** Is the applicant’s proposed RCT design valid? In other words, does it have a sufficiently large sample (as shown through a power analysis) and other elements needed to generate credible evidence about the program’s impact on one or more targeted outcomes of high policy importance? We strongly encourage designs that measure such outcomes in both the short and longer term, as appropriate for the type of program and study, to determine whether the effects endure long enough to constitute meaningful improvement in people’s lives. Reviewers, in assessing an applicant’s proposed design, will use Key Items to Get Right When Conducting RCTs of Social Programs as a reference.
Applicants, as part of their discussion of this criterion, should specify the study’s primary outcome(s) of interest; how they will measure the outcome(s) and over what length of time; and what analyses they plan to conduct (e.g., any subgroups to be examined, regression methods to be used).

D. Other items to include in the letter of interest and invited full proposal:

1. Applicants should specify the amount of funding requested, and, for the full proposal only, attach a one-page project budget that is consistent with LJAF’s indirect cost policy (see attachment). To reduce study costs, we encourage the use of administrative data (e.g., wage records, state educational test scores, criminal arrest records) to measure key study outcomes, wherever feasible, in lieu of more expensive original data collection. In addition, if the applicant proposes any implementation research to complement the RCT, we suggest streamlined approaches that do not greatly increase the overall study cost. If additional funding from other sources is needed to carry out the study, we request that the applicant’s budget show (i) the total study cost, and (ii) the portion of that cost to be covered by LJAF; and include an attached letter or other communication showing that the additional funding will be in place prior to LJAF’s grant award.

2. Applicants should specify the proposed recipient of the grant award, which we generally expect to be a tax-exempt organization (e.g., nonprofit organization, university, or governmental unit). If an organization is not tax-exempt and wishes to apply, please contact David Anderson (see contact information below).

3. Applicants should briefly address how their study meets recognized ethical standards for research with human subjects.

III. What To Expect in the Grant Agreement: We will ask awardees, as a condition of their award, to –

- Pre-register the study on the Open Science Framework (OSF) website and, prior to commencement of the study, upload a copy of the research and analysis plan described in their proposal.

- Provide us with brief phone or email updates on the study’s progress on a periodic basis, and before making any key decisions that could materially affect the study’s design or implementation.

- Submit concise reports on the impact findings at appropriate intervals. These reports should make it easy for readers to see the study’s main results and gauge their credibility (e.g., by showing the similarity of the treatment and control groups in pre-program characteristics, the amount of sample attrition, and the statistical significance of the impact findings).

- Make their datasets and related materials (e.g., survey instruments, code used to clean and analyze datasets) publicly available on the OSF site. We ask applicants to do this within one year of the last data collection, and only to the extent allowed under any confidentiality/privacy protections.

[Note: The above list previews the main items in the grant agreement, but is not an exhaustive list of the conditions of the award.]

IV. Questions? Please contact David Anderson, Director of Evidence-Based Policy (danderson@arnoldfoundation.org, 202-239-1248).
Laura and John Arnold Foundation
Indirect Cost Policy
Effective February 1, 2018

Policy Purpose
The Laura and John Arnold Foundation (“LJAF”) requires that any resources awarded by LJAF to an organization be dedicated to the costs necessary to accomplish the charitable, educational, or scientific purpose of a grant.

Direct & Indirect Cost Definitions
LJAF permits grantees to request funding for all of the direct costs associated with a project, including salaries and federally required benefits for employees, travel, meetings and conferences, data access fees, and payments to third-party consultants and sub-grantees that are directly attributable to or created specifically for the purpose supported by a particular grant. Moreover, LJAF also recognizes that in order to successfully accomplish the purpose of a grant, grantees often need additional financial support to cover a portion of their indirect costs. LJAF’s Indirect Cost Policy (the “Policy”) defines indirect costs as organizational costs incurred for a common or joint purpose benefitting more than one project and not exclusively attributable to or created for the project supported by a particular LJAF grant. Please see Appendix A for examples of indirect costs covered under this Policy.

Allowable Indirect Cost Rates
The Policy permits institutions of higher education, including community colleges, to receive an indirect cost rate of 15 percent (15%) of total direct project costs; all other organizations (e.g., non-profit, governmental, for-profit, etc.) may receive an indirect cost rate of 20 percent (20%) of total direct project costs.¹ ²

Requirements
For each grant proposal, grantees must provide: (i) a project budget, (ii) a corresponding budget narrative that clearly outlines and defines³ the total direct project costs, and (iii) fringe rate calculation detail for all personnel allocated to the project within the project budget.

Each new grant request received by LJAF will be independently reviewed and approved subject to the provisions set forth in this Policy. LJAF maintains the sole discretion to determine the approved classification of direct and indirect costs for each grant.

Please contact Bridget Williamson, LJAF’s Grants Budget Manager, at BWilliamson@arnoldfoundation.org with any questions regarding this Policy.

¹ Grants with the primary purpose of providing general operating support are not subject to this Policy.
² Third-party consulting or subcontract expenses, sub-awards, and tuition (if applicable) shall not be included as part of the total direct project cost base for the indirect cost calculation.
³ Please review LJAF’s Budget Template for additional guidelines.
Appendix A  
Examples of Indirect Costs

The examples listed in this Appendix A are for general guidance. The list is not exhaustive, and LJAF, in its sole discretion, will make the final determination on the approved classification of direct and indirect costs for each grant.

<table>
<thead>
<tr>
<th>Expense Type</th>
<th>Indirect Expense Examples</th>
</tr>
</thead>
<tbody>
<tr>
<td>Personnel</td>
<td>Executive Management (e.g., CEO, COO, CFO, etc.) and Central Operational Functions (e.g., Accounting, HR, IT, Legal, etc.)[4]</td>
</tr>
<tr>
<td>Consultants</td>
<td>Contracted work for general operational functions (e.g., legal work or audits)</td>
</tr>
<tr>
<td>Travel and Accommodations</td>
<td>Any travel not required to achieve the grant’s purpose; accommodation costs over and above the market rate for a specific area</td>
</tr>
<tr>
<td>Equipment</td>
<td>Equipment that can be used by an institution for other purposes or projects (e.g., computers, telephones, office furniture)</td>
</tr>
<tr>
<td>Rent</td>
<td>Office space rental, utilities, and communications associated with Central Operational Functions (i.e., rent expenses incurred whether or not the subject grant is awarded)</td>
</tr>
<tr>
<td>Other</td>
<td>All materials and supplies used for more than one purpose or project, printing and postage costs, memberships and subscriptions, hardware and software programs for general operational functions, organizational insurance, etc.</td>
</tr>
</tbody>
</table>

Note: Direct and indirect costs awarded to grantees may only be used for charitable, educational, and/or scientific purposes as such purposes are generally defined by those authorities interpreting the provisions of Section 501(c)(3) of the Internal Revenue Code, and may not be used to carry on propaganda, influence legislation, fund any political campaign, influence the outcome of any election, carry on any voter registration drives, or violate any applicable local, state, federal, or foreign law.

[4] To the extent members of an executive management team are contributing to the project beyond their normal role as an organizational leader, a grantee may request a direct allocation with a corresponding justification explaining the additional contributions of such individuals.
